

## **PhyMed Named to Becker's Top Places to Work**

*Brentwood company receives accolade from Becker's Healthcare*

PhyMed has been named to the Becker's Healthcare "150 Top Places to Work in Healthcare 2018" list. The annual accolade highlights hospitals, health systems and healthcare companies that promote diversity within the workforce, employee engagement and professional growth.

According to Becker's, the organizations selected for this honor offer benefits and opportunities for employees to build successful careers above and beyond the average healthcare provider or company and they encourage professional development and promote leadership from within. Many employers on the 150 Top Places list offer unique wellness and personal benefits to ensure employees strike a positive work/life balance as well as employee recognition programs to highlight their accomplishments. In addition to providing competitive benefits and vacation packages, many of the organizations on this list support volunteerism and organize community outreach activities.

"We are very excited to be included as one of the 150 Top Places to Work in Healthcare," said Marty Bonick, chief executive officer for PhyMed. "Every day, we strive to develop leaders, acknowledging the importance of ongoing educational opportunities while recognizing the individual talent and skill each one of our employees bring to the PhyMed family. We are so pleased to be recognized within this group of peers that strive to provide both a great work environment as well as to enhance the healthcare experience for patients and our partners."

Becker's Healthcare developed its list based on nominations and editorial research. Organizations do not pay and cannot pay for inclusion on this list. This list is not an endorsement of any hospital, health system or company mentioned.

### **About PhyMed Healthcare Group**

Based in Nashville, PhyMed Healthcare Group is a physician-led and owned leader of anesthesia services whose focus is in redefining perioperative partnerships across the country. PhyMed leverages its technology to create efficiencies resulting in superior clinical outcomes, streamlined patient flow, optimized clinical staffing and a reduction in expenses across the preoperative continuum. Most importantly, PhyMed's clinicians create positive patient interactions before, during and after surgery. PhyMed Healthcare Group is a trusted partner to healthcare systems, ambulatory surgery centers and office-based anesthesia in multiple states with over 650 clinicians nationwide.
